SUMMARY

Aspiring IT professional with hands-on experience in web and mobile application development, including Android and Firebase-based projects. Passionate about building practical, user-friendly systems and continuously learning new technologies. Experienced in collaborative software development, UI design, and delivering academic software solutions.

KEY STRENGTHS:

Web & Mobile Development • Application Design • Team Collaboration • Adaptability • Fast Learner • Detail-Oriented • Continuous Learning

EDUCATION

Bachelor of Science in Information Technology (BSIT)

University of Cebu Banilad Campus, Cebu City, Philippines | Graduated 2026

Dean's List Recipient (First Year)

PROJECTS

PigSoil+: Sustainable Swine Waste Management for Organic Farming

Academic Project | UI Designer & Front-End Developer | May 2025

Developed an Android application that helps pig farmers convert swine waste into organic fertilizer through a guided step-by-step process, promoting sustainable farming practices.

- Key Contributions :
- Designed the mobile application's user interface and prototype using Figma.
 - Developed the Android application's front end using XML and basic Kotlin.
 - Focused on creating a simple and user-friendly interface for farmers.

LightUp: IoT-Based Smart Lighting Control System

Academic Project | UI Designer & Front-End Developer | September 2025

Developed an IoT-based smart lighting system that enables users to remotely control LED lights through an Android mobile application. The system utilizes Firebase cloud services for secure user authentication and real-time data synchronization.

- Key Contributions :
- Designed the mobile application's user interface and prototype using Figma.
 - Developed the Android application's front end using XML and Kotlin.
 - Integrated Firebase Authentication for secure user login and registration.
 - Collaborated with teammates to support the integration of the mobile application with the IoT system.

RestAssured – Capstone Project

Capstone Project | Front-End Developer | December 2025

Developed RestAssured, an integrated platform for funeral services consisting of a web application for funeral service providers and a mobile application for end users. The platform was designed to streamline service management and improve accessibility for families in need.

- Key Contributions :
- Designed the website prototype and user interface using Figma
 - Implemented the front-end interface using HTML, CSS, and JavaScript
 - Collaborated with teammates throughout the development and testing of the application.
 - Focused on building an accessible and user-friendly platform for funeral service providers and clients

TECHNICAL SKILLS

PROGRAMMING LANGUAGES

- JavaScript
 - Python
 - PHP
- Kotlin
 - SQL
 - C
- XML
 - Java

WEB TECHNOLOGIES

- HTML

PLATFORMS & TECHNOLOGIES

- Salesforce
- CSS

APIS & SERVICES

- Firebase Authentication

DATABASE SYSTEMS

- MySQL
 - Firebase Realtime Database
- SQL Server

DEVELOPMENT TOOLS

- Figma
 - Git/GitHub
 - Visual Studio/VS Code
- Android Studio
 - IntelliJ IDEA
 - draw.io

SOFTWARE ENGINEERING

- Object-Oriented Programming (OOP)
- Database Design (ERD)
- Agile & Scrum Methodologies
- Unit Testing & Debugging

CERTIFICATIONS & TRAINING

- Accenture Academy – Technology Internship Training (Salesforce Platform) – Accenture (Feb 2025 – Apr 2026)
- Certificate of Appreciation Facilitator– Basic Robotics and Programming Workshop – Bukas Palad Foundation (May 2026)
- Certificate of Participation on UI/UX DESIGN – University of Cebu (February 2025)
- Certificates of Participation Human-AI Collaboration –University of Cebu (February 2026)
- Certificates of Participation AI Evolution –University of Cebu (April 2026)
- Certificates of Participation Project Management and IT Interns Industry Preparedness– University of Cebu (April 2026)
